# SUPPLY CHAIN & BUSINESS PLANNING ASSESSMENT

If material shortages, rising costs, or production delays are limiting your growth, UIP can help with a structured, data-driven assessment designed to uncover gaps, risks, and identify improvement opportunities across your supply chain and business planning processes. Our assessment covers planning, operations, suppliers, inventory, customer service, technology, and financial performance to help you understand any misalignment and to show you what to fix first.

## SUPPLY CHAIN OFFERINGS

### Business Planning Assessment

Essentially a 'Check Engine Light' for supply chain & business planning processes.

### Supply Chain 101 Workshop

For companies whose current strategy is just praying the truck shows up on Tuesday.

### Planning & Financial Alignment

Most businesses are driving at 100 mph—we make sure the steering wheel is connected to the tires.

### Supply Chain Planning Foundations

Help your supply chain team stop being heroes who must constantly fix crises and start being boring professionals who avoid problems in the first place.

### Sourcing, Procurement and Supply Risk Management

Manage risk and cost through visibility, cross functional alignment, and disciplined decision making, not by squeezing suppliers harder.

### Performance and Analytics

Instead of just hoping things go well, learn how to use metrics and dashboards to manage your supply chain and drive improvement.

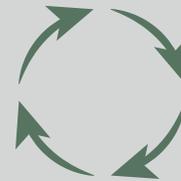

## HOW WE WORK

### Assess

Evaluate your end-to-end supply chain and planning processes

### Optimize

Continuously improve using real-time metrics

### Design

Align demand plan, sourcing, inventory, and logistics to production demand

### Implement

Connect suppliers, systems, and internal teams

## WHAT YOU GAIN

- **Lower Material Costs**  
Better sourcing decisions and reduced expediting
- **Fewer Production Delays**  
Production schedules supported by supply
- **Reduced Inventory Carrying Costs**  
Improved inventory planning and control
- **Improved On-Time Delivery**  
Stronger coordination from supplier to customer
- **Better Decision-Making**  
Clear visibility across the supply chain
