LEAN MANUFACTURING 101 with simulation

**8 HOURS
ON SITE**

Optimize time, costs, and resources to do more with less.

Learn the principles of Lean Manufacturing in this one-day workshop that includes a fast-paced presentation with a hands-on manufacturing simulation.

Gain a clear understanding of the eight wastes in manufacturing and understand real-world approaches for waste reduction that can increase your company's bottom line. Workshop attendees will be assigned production jobs in a fun-filled, simulated factory.

Through this event, you'll complete four levels of simulation and both trainings and discussions between sessions.

WHAT YOU'LL LEARN

- Shop floor layouts & work cells
- Eliminating the 8 wastes of manufacturing
- Batch reduction & one-piece flow
- Organization & visual controls
- Point-of-use storage
- Quality at the source
- Kanban
- Takt time
- Standardized work
- Setup reduction
- Work teams

**Make your
operation a
Lean machine.**
