

RAPID IMPROVEMENT EVENT

**3^{TO}5
DAY
IMPROVEMENT
SPRINT**

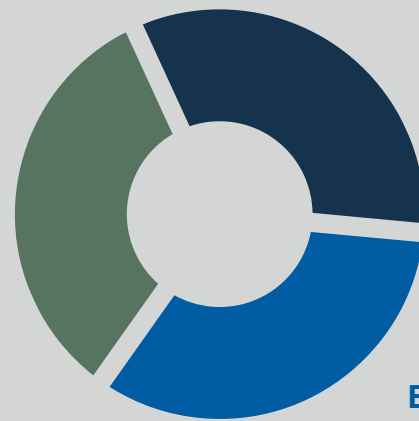

Unlock rapid, real-world change in your operations with a **Rapid Improvement Event** (also known as a Kaizen Event/Blitz). This isn't just a planning session; it's a focused, 3 to 5 day improvement sprint where a client selected team of 7-10 people, guided by our experts, dives deep into a client-selected operational area.

We adhere to a repeatable and teachable system, starting well before Day 1 with a weekly preparation check-in starting 3 weeks before event kickoff, ensuring everyone is ready for action.

Crucially, we work to actually implement change during the event itself—moving equipment, establishing new metrics, organizing, and updating policies—rather than just generating a "to-do" list. By using tools like Value Stream Mapping, we help your team identify and eliminate systemic waste, training them in Lean thinking so they can confidently repeat these improvements long after we're gone

TYPICAL FOCUS AREAS INCLUDE:

Solving
Information
Flow
Bottlenecks

Boosting
Output &
On Time
Delivery

Improving
5S &
Ergonomics
