IN A  
BOX

# STRUCTURED PROBLEM SOLVING

Step into effective coaching immediately with **Kata in a Box**. This offering is a focused, **single-day classroom experience** designed specifically for managers who want to elevate their coaching game.

## Circuit Board Simulation

We use our dynamic "Buzz Electronics" circuit board simulation (adapted from Lean 101) as the practical, real-world training ground. Instead of abstract theory, you'll learn to use the Coaching Kata methodology, popularized by the book Toyota Kata, to give robust, open-ended, and results-based guidance.

The simulation lets participants practice targeted, high-value coaching interactions on the spot, ensuring you walk away with the confidence and skills to immediately apply Lean thinking to your leadership, and deliver a powerful, new coaching approach to your own teams.
